## EXPERIENCE

### Full Stack Developer

MinabTech, Addis Ababa. March 2022 - PRESENT

Building a multitude of company products from requirement specification to the end of a project.

- Piloted **unit testing** using **vitest** and **vue testing library** on existing **components**.
- Crafting state-of-the art **user interfaces** using **TailwindCSS** and **Vue.js**.
- Built various features of all **front-end clients** and **API** for a fund-tracking management system.
- Utilized **event-driven** architecture with **NATS Server** and **Golang**.
- Developed an **API** for transportation service providers.
- Adopting and **migrating** **Vue2** codebase to **Vue3**.

**Stack** - *Vue3, TailwindCSS, Golang, SQL, Hasura GraphQL, PostgreSQL, NATS. ELK STACK.*

### Front-End Developer

MinabTech, Addis Ababa. November 2021 - March 2022

- Participated hugely in the agency's legal verification system to send citizens overseas with teammate developers.
- Developed a job aggregation platform with **different filters** to suit customers' best job matches.
